

# CIP-12DR Electronic Directory

- \* Up to 12 Numbers
- \* Timed Night Service
- \* Easy to Programme
- \* Telephone Line or PABX
- \* Stainless Steel Panel
- \* Stand Alone
- \* 2 Relay Outputs
- \* Weather Resistant
- \* Easy Install
- \* Optional keypad/prox

*The CIP-12DR is a telephone entry system which connects directly to a dedicated telephone line or PABX extension. The system is supplied complete with front door speech panel, CIP-12 interface and power supply. Stainless steel or modular aluminium are options, both in flush or surface.*

*Once installed, the unit is programmed via a telephone. The CIP-12 is a 12-channel unit, therefore the system can be supplied with 1 button to call 1 number, or up to 12 buttons to call 12 numbers - each channel has the capability of having a "night service" number, so after office hours an alternative number will be automatically contacted (this service triggered via a timer).*

*Door release is initiated from the receiving handset (traditional or mobile), and the system can be programmed with various options on answer - 2 relays are available to switch from the handset.*

*The units are supplied as complete kits, and can incorporate integral keypad or proximity reader.*

*The CIP-12DR is a very cost effective unit, and only requires a telephone line and minimal installation time to complete.*

## Specification

Voltage:	12vac or 18vdc
Current:	50mA passive, 150mA active
Numbers:	12 Channels, 2 numbers per channel
Environmental:	IP65, -20 to +70C
Inputs:	2 x Timer Inputs to operate night service
Outputs:	2 Relay Outputs, Timed

## Product Code

CIP-12DR-1-F/S (flush or surface)	1 Channel Kit - Stainless
CIP-12DR-1-MOD-F/S (flush or surface)	1 Channel Kit - Modular
CIP-12DR-n-?-?	Multi Way (stainless or modular, flush or surface)
MOD-CBB	Integral 100 user keypad
MOD-PROX	Integral 500 user proximity system
