## Stainless steel posts

**Range: Reader/Intercom posts**

**CDVI LTD (UK) manufactures a wide range of stainless steel posts for a variety of applications. Constructed from high quality stainless steel, grained finish and laquered for added protection, these posts are suitable for internal and external environments where aesthetics are important.**

Standard posts are stock items, these include wheelchair, car and pedestrian height - dual height and combinations are made to order with a very fast lead time.

Bespoke posts and those which need to accept 3rd party products can be manufactured to a customers specification. These "special" order posts will be manufactured only following receipt of signed approval of our drawings from the customer - this ensures we manufacture exactly what is required, and protect the end-user, the installer and CDVI.

Our standard posts are ready to accept all CDVI products, including audio & video entry, access control readers, exit and disabled switches etc.

Schematic drawings of our standard posts are available upon request.

### Product codes

<b>SSP-PED</b>	Pedestrian height post (1.6M/80mm <sup>2</sup> )
<b>SSP-DDA</b>	Wheelchair height post (1.2M/80mm <sup>2</sup> )
<b>SSP-CAR</b>	Car height post (1M/80mm <sup>2</sup> )
<b>RPSS</b>	100mm square 1.2M blank angled top
<b>RPSS-100D</b>	Round post, 100mm diameter
