

PROFIL100EINT

The PROFIL100EINT keypad from CDVI is a heavy duty, stainless steel surface keypad, with a slim design particularly suited to door frames and harsh environments.

Its construction, and high resistance to vandalism, makes the PROFIL100EINT suitable to secure external sites and parking areas in addition to industrial, public, commercial, retail and residential applications.

Backlit keys assist in low-light conditions, and the option to allow users to change their own codes, and 2 relays as standard, increases the flexibility of the products.

The self-contained keypad has all the electronics within the keypad housing. Programming of the unit is very simple. A master code is entered which allows access to the programming menu - from there, codes can be added or deleted, code lengths can be determined (4-6 digits in length) and the lock relays can be individually timed between 1 and 99 seconds or as latched (toggle between on & off). Programming is also assisted with visual and audible feedback.

Overview

- High grade stainless steel
- Backlit buttons
- IP64
- Audible & visual feedback
- 100 user codes
- 4, 5 or 6 digit codes
- Trade button feature
- Programming via master code
- Self contained
- 5 year warranty

PROFIL100EINT - Technical Specifications

Product Specifications

Material: high grade stainless steel
IP Rating: IP54

Input Specifications

Request to exit
Timer for trade function

Output Specifications

2 relays

Electrical Specifications

Operating voltage: 12V to 24Vac / 12V to 48Vdc
Current: 25 to 80 mA

Dimensions

Dimensions: 165 x 43 x 27mm
Environment: -25°C to 70°C
