

CDVI Announces New Innovative Access Control Solutions

High Wycombe, UK, January 29, 2019 – CDVI, a leading access control manufacturer worldwide, announced new innovative products to its extensive range of access control solutions. From Bluetooth keypads and stylish DESFire readers to their ATRIUM Online Access Control, this one-stop-shop offers to its UK and Irish customers cutting-edge and efficient solutions for private and public buildings.

"Our experience as an access control manufacturer truly makes CDVI the installer's choice. Thanks to innovative products answering installers' needs, CDVI remains after 20 years a major player in the English security market." – Daniel Phillips, UK Product Manager.

New products include Bluetooth keypad and DESFire Reader.

With strong innovation and stylish design, CDVI's new products have already been well received in the security market.

The award-winning GALEO keypad now features a Bluetooth connection. Its phone app (available on iOS and Android) provides installers and end users with a fast and reliable method to control the keypad and pin codes available.

The SOLSYSDW DESFire reader gives an anytime status of the door through multi-coloured LEDs and links back directly to CDVI's ATRIUM Online Access Control system, giving installers and end users an efficient and secure door control solution.

About CDVI

The CDVI group is a worldwide manufacturer of leading-edge security solutions for every installer, offering products ranging from Biometric & Online Access Control, Electromagnetic Locking, Keypads, Stand Alone Entrance Systems to Door Automation. Without a doubt, you will find a product at CDVI for your latest project and with the free in-house training available at their facility in High Wycombe you will be able to get the most out of CDVI products.
